

Transportation Research Services

Roadway Products

NEXCO-West USA excels in providing research services on civil engineering and transportation topics, with a focus on US and Japanese industry trends. We have over a decade of experience in compiling resources on roadway products, from striping paint to reflective signage. Get insight on the pros and cons of specific products or product families so that you can fuel your business decisions.

Roadway Construction Materials

Work Zone Protection

Repair Products (Patching and Sealant)

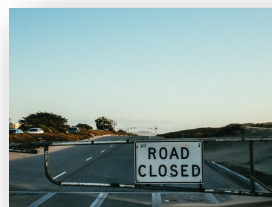

Roadway Signage

Roadside Markers (Striping, Delineators)

Barrier Systems, Railing, Sound Barriers

Our Advantage

We are able to benchmark (compare and contrast) practices in the US and Japan by leveraging our global professional network, our knowledgeable team of engineers, and our collection of information on private and public engineering organizations. We have served past clients by not only summarizing the prominent products on the market, but also analyzing proof of concept studies on the products.

Past Research Projects

Introduction of Rapid Patching Materials

Research on Concrete Repair Materials

A client from Tokyo, Japan asked NEXCO for assistance in the sale of rapid-setting patching material for roadways. The product was received favorably by West Coast DOTs and other roadway owners for its quick installation and surprising durability.

A client from Kansai, Japan was toured through the World of Concrete event in Las Vegas. There, they were impressed by a concrete mix developed by an exhibiting vendor. From there, NEXCO facilitated the research and eventual sale of this product to the client.
